

Temperature Gradient for WPS2 Plates

May-26-16
12:11 PM

Since previous experiment (80 C, 5') showed no fungal grows on the SA/SAL plates

Proposed the matrix of conditions for WPS2 enrichment - tentative spore former:

Dilutions 1:1000, 1:10000 should be considered - since they showed optimal in the previous run

	1'	2'	3'	4'	5'
55 C	A1	A2	A3	A4	A5
65 C	B1	B2	B3	B4	B5
75 C	C1	C2	C3	C4	C5
85 C	D1	D2	D3	D4	D5
